

## THE BEGINNING OF A NEW AGE

We welcome you to **Guillén Group**: the same company as always, with a completely renewed aesthetic and philosophy.

Our values endure: always offering the highest quality, focus on the customer, care for the guarantee and the service ... but it is time to take a new step and think in a more global way, with an image according to the quality of our products and the ambition to continue growing.

If you are looking for the highest quality and profitability for your logistics business, we are your best solution.

## SEMITRAILER CONTAINER CHASSIS

**MORE THAN COVERING  
THE EXPECTATIONS,  
IT EXCEEDS THEM.**

Guillén, faithful to its style and philosophy, is committed to values that consolidate total excellence and the full satisfaction of our clients, such as trust, profitability, technology and commitment.

Values that we apply in each of the solutions we offer our customers, such as the exceptional **Fix (non extendable) container chassis semitrailers** in their different models.

Excellent results in the Actual Tests of Subjection to Extreme Efforts of the Semitrailer.

## I+D+I AT THE SERVICE OF THE USER

- We take advantage of synergies with our partners, applying the most advanced technology to our semitrailers, as in the case of tailGuard or telematics.
- In permanent contact with the market and attentive to their needs we are constantly evolving our semi-trailers, as is the case of the *X Light* series.
- We develop innovative solutions such as swiveling container anchorage arm (patented system), from which our PC-45/40 HC *X Light* is born.
- We are firmly committed to innovation and development, in order to offer our customers the best results in terms of efficiency, safety, versatility and profitability.

[1] [2] [3] Swiveling container anchorage arm\* for 40' H.C. container locking in PC-45/40-HC *X Light* and front traverse for 45' H.C. container locking.

[4] Under rear bumper roller for Ro-Ro operations protection.

[5] Standard rear *X Light* series finishing.

[6] Extendable rear bumper for 45' containers loading.

## QUALITY, DESIGN AND TECHNOLOGY

- Minimum Death Weight, maximum resistance (Maximum Technical Allowed Mass of 41,000 kg).
- Simple, practical and comfortable in the use by the user.
- Different options and equipment developed to satisfy the needs of each customer.

- [1] Manual extension aluminium landing legs.  
 [2] Detachable GenSet fitted in middle chassis.  
 [3] PC-20 tool box.  
 [4] PC-20 turning spare wheel carrier with winch.  
 [5] 47° tipping with all chromed cylinder extensions.  
 [6] Front hydraulic tipping cylinder and guided bolster.
